INTRODUCTION

Review question / Objective: Atrial fibrillation patients; acupuncture versus pharmacological resuscitation; efficiency; randomised controlled trial.

Condition being studied: A study of the efficiency of adding acupuncture to the treatment of patients with atrial fibrillation

Acupuncture versus pharmacological resuscitation in treatment of atrial fibrillation in a randomised controlled trial: systemic review and meta-analysis

Li, Y¹; Song, J²; Wang, X³; Han, L⁴; Wu, B⁵.

Review question / Objective: Atrial fibrillation patients; acupuncture versus pharmacological resuscitation; efficiency; randomised controlled trial.

Condition being studied: A study of the efficiency of adding acupuncture to the treatment of patients with atrial fibrillation to provide theoretical guidance for clinical application.

Information sources: PubMed; embase; Cochrane library; cnki; vip database; wanfang database.

INPLASY registration number: This protocol was registered with the International Platform of Registered Systematic Review and Meta-Analysis Protocols (INPLASY) on 30 May 2021 and was last updated on 30 May 2021 (registration number INPLASY202150108).

to provide theoretical guidance for clinical application.

METHODS

Participant or population: Atrial fibrillation patients.

Intervention: Acupuncture.

Comparator: Pharmacological resuscitation.

Study designs to be included: Randomised controlled trial.

Eligibility criteria: Acupuncture versus pharmacological resuscitation in treatment of atrial fibrillation in a randomised controlled trial.

Information sources: PubMed; embase; Cochrane library; cnki; vip database; wanfang database.

Main outcome(s): Efficiency.

Quality assessment / Risk of bias analysis: Review manager 5.3.

Strategy of data synthesis: Fixed and random method; meta regression.

Subgroup analysis: During of acupuncture.

Sensitivity analysis: All right.

Country(ies) involved: China.

Keywords: Atrial fibrillation; acupuncture; efficiency; meta-analysis.
