INTRODUCTION

Review question / Objective The purpose of this study was to investigate the clinical value of bile transfusion in patients with obstructive jaundice.

Condition being studied Obstructive jaundice.

METHODS

Participant or population Patients with obstructive jaundice.

Intervention Bile reinfusion.

Comparator Liver function, nutritional status, and length of hospital stay.

Study designs to be included Comparison between groups.

Eligibility criteria None.

Information sources pubmed\Wanfang\CNKI.

Main outcome(s) SMD and 95%CI.

Quality assessment / Risk of bias analysis Plot of funnel.

Strategy of data synthesis stata and revman software were used.

Subgroup analysis None.

Sensitivity analysis Sensitivity analysis was performed using stata software, and the results were found to be robuststata was used.

Country(ies) involved China.

Keywords Obstructive jaundice; Bile reinfusion; Liver function; Nutritional indicators.
